Education

2017 - 2022

Studies in Computer Engineering

University of Alicante, Alicante, Spain

Language

Spanish (native)

English

Raul Berna Riera

Web Developer

I am a 24-year-old software developer from Alicante, Spain, passionate about technology and an enthusiast for both web development and padel. I am continuously learning in the world of software development, and I am motivated to keep learning with every project I undertake. Every day brings technological advancements, making it a never-ending learning cycle. Therefore, I am open to learning new things, even though my primary interest is in frontend development.

Experience

Jan 2022 - May 2022

Evvant SL | Murcia, Spain

Web Developer

In my role at a storage rental company, I developed and maintained the reservation and management system using ReactJS and NodeJS. I implemented an interactive map to facilitate storage unit reservations, and also developed features for purchasing, cancelling, and modifying units across locations such as Elche, Alicante, Madrid, and Bilbao. I ensured system scalability and security, continuously enhancing its performance.

Sep 2022 - Apr 2024

Nanonino SL | Alicante, Spain

Web Developer

Working hand in hand with the developer team in India and in Spain with the design and marketing team. With this structure I have worked on the following projects:

- **CBD Product Marketplace:** I was responsible for the **development and ongoing maintenance** of an **e-commerce website** tailored for a CBD product marketplace. My role involved extensive **product editing, structuring of pages, and systematic categorization**. I also implemented enhancements to the navigation menus and executed strategies to optimize the **website's search engine rankings**, significantly improving online visibility and user engagement.
- **Smart Contracts Development:** I played a crucial role in several projects, where my main task was **implementing and maintaining the infrastructure required for smart contract functionality**. This involved enhancing system interactions and ensuring smooth management of digital transactions, contributing to the projects' success in the blockchain space.
- **Web and Mobile Application Development:** I have been part of the **creation of progressive web applications** aimed at providing **cross-platform compatibility** with both Android and iOS devices. My focus was on ensuring robust operation, high responsiveness, and modern aesthetics, while also integrating systems that could efficiently **manage and scale large datasets**, enhancing overall user experience.
- **AI-Powered Reservation System for Golf Courses:** I have collaborated with the development and integration of an **innovative reservation system**, enabling both **voice and chat-based bookings** through AI. The system was designed to ensure a smooth and accessible user interface, allowing seamless access from various devices and providing a **reliable and agile operational environment**.

Skills

- **Programming Language:** Javascript, Typescript, Python, NodeJS, HTML, CSS
- **Frameworks & Libraries:** ReactJS, NextJS, NestJS, Express, TailwindCSS, OpenAI API
- **Databases:** MongoDB, Firebase, MySQL, Redis, Supabase
- **Development Tools:** Git, Github, Docker
- **Platforms:** GCP, AWS
- **Soft skills:** Team work, Communication, Time Management, Always learning
