Education

2017 - 2022
Studies in Computer Engineering
University of Alicante, Alicante, Spain

Language

English
Spanish (native)
European Passport

I am a 24-year-old software developer from Alicante, Spain, passionate about technology and an enthusiast for both **web development** and **padel**. I am continuously learning in the world of **software development**, and I am motivated to keep learning with every project I undertake. Every day brings technological advancements, making it a never-ending learning cycle. Therefore, I am open to learning new things, even though my primary interest is in **frontend development**.

Experience

Sep 2022 - May 2022
Nanonino SL | Alicante, Spain
Fullstack Web Developer

Working hand in hand with the developer team in India and in Spain with the design and marketing team. With this structure I have worked on the following projects:

- **Web and Mobile Application Development:** I was involved in creating **progressive web applications** that support **cross-platform functionality** for **Android and iOS devices**. My responsibilities included ensuring robust operation, high responsiveness, and modern aesthetics. I also worked on integrating systems to **efficiently manage and scale large datasets**, thus **improving the overall user experience.**
- **Smart Contracts Development:** I played a pivotal role in implementing and maintaining the necessary infrastructure for **smart contracts**. My efforts focused on enhancing system interactions and **ensuring efficient management of digital transactions,** which **bolstered the projects success** in the blockchain space.
- **AI-Powered Reservation System for Golf Courses:** I collaborated on the development and integration of an advanced reservation system powered by AI. This system supports both voice and chat-based bookings and is designed with a focus on a smooth and accessible user interface. It allows seamless access from various devices, aiming to provide a reliable and agile operational environment, with loading times under **100ms.**

Jan 2022 - May 2022
Evvant SL | Murcia, Spain
Fullstack Web Developer

In my role at a storage rental company, I developed and maintained the reservation and management system using ReactJS and NodeJS. I implemented an interactive map to facilitate storage unit reservations, and also developed features for **purchasing, cancelling, and modifying units across locations such as Elche, Alicante, Madrid, and Bilbao.** I ensured system **scalability and security,** continuously **enhancing its performance.**

Skills

- **Programming Language:** Javacript, Typescript, Python, NodeJS, HTML, CSS
- **Frameworks & Libraries:** ReactJS, NextJS, NestJS, Express, TailwindCSS, OpenAI API
- **Databases:** MongoDB, Firebase, MySQL, Redis, Supabase
- **Development Tools:** Git, Github, Docker
- **Platforms**: GCP, AWS
- **Soft skills:** Team work, Communication, Time Management, Always learning
